

School of Computer Science – Coursework Issue Sheet

Session	2025	Semester	Spring
Module Name	Operating Systems and Concurrency	Code	G52OSC
Module Convenor(s)	KR. SELVARAJ		
Coursework Name	Operating Systems and Concurrency	Weight	50%
Deliverable (Submitted through the Moodle Link)	This is a “Group Project” with 3 members in a group. There are two components in the deliverable. They are Software part and Report part. The requirements for each part is given below. Mark allocation is given in bracket for each part. For your implementation, you can refer the external sources of information and AI support for completing the work. If you happen to use these external sources, it should be referenced in your report on ‘where and how’ are they used in your work. You can incorporate external libraries or any supporting software tools in your code to let your simulation work well with user friendly interface. You can use any IDEs (Visual Studio Code, IntelliJ IDEA, Code::Blocks, Eclipse, etc.) or any other online compilers. Use pthreads if you would like to use threads in your implementation. Your work should run on a single C file. 1. Software Part: (30%) • Zip file containing the source code (.c file) and Readme file (with accurate information on how to run your program). 2. Report Part: (20%) (a) Outer Cover page with Group number, your name, id and course name (All members) (b) First page with table of contents (c) Any supporting explanations about your code or technique used in your work Answering questions (refer the numbers 1-6 in the report part of the question) with 4 sets of Input/output screen displays (d) Additional supporting software code (if there is any) or the explanation about the software features used in the program (e) Conclusion about your work (f) Appendix Source code listing (with comments for readability) (g) Peer Review form		
Format (summary of the technical format of deliverable, e.g. Java source code as zip file, pdf file, doc etc.)	1. Zip File: (Zip file for the Software Part as indicated above with your First name of all members). Example: (G1_X_Y_Z).Zip 2. Document File: (Only one doc file for the Report part as indicated above with your group name). Example: (G1_X_Y_Z).doc		
Issue Date			
Submission Date	30 days from the date of the release (8th Dec 2025, 10pm)		
Submission Mechanism	Only Softcopy - Submission is via Moodle (both zip and Doc file) 1. Software File (Zip File) 2. Report (DOC File)		
Late Policy	Mark reduced by 5 percentile points per working day late. Maximum of 5 working days late is permitted.		

(University of Nottingham default will apply, if blank)	
Feedback Date	Two weeks from the submission date
Feedback Mechanism	Through Mail.
Instructions	The group members are not allowed discuss their work with other group members. Copying the work of any other student will incur severe penalties. Each submitted report will be automatically checked against every other report submitted.
Assessment Criteria	a) The code should work correctly and does not crash. b) Marks will be reduced for inaccurate results generated from the system. c) Should allow the user to Input the data and generate output d) The Report part (with answer for the questions) with analysis of the methods or algorithm used in your program e) Information about, How you run your code? f) Professional interface using sw tools can lead to better marks
